

Libya Defense Technology and military equipment Exhibition

معرض ليبيا لتكنولوجيا الدفاع والتجهيزات العسكرية

From 13 To 15 Nov 2023

International Tripoli Exhibition

Regional partner

Organizing and supervising

Sponsored by
Minister of Defense and General Staff

This exhibition is considered a gateway to keep abreast with the global progress and development in the military field, in both its aspects of technological and military equipment. One of its most important goals is to present the latest findings of the world in this field by attracting specialized companies to exchange experiences and technology. This exhibition will provide a great opportunity to the specialists through the Participation of local and international companies and by opening the way for concluding economic agreements and business contracts that will be reflected positively from a Libyan perspective. This exhibition is also considered a new and unique shift in our country to lay the foundations for keeping pace with International development in this highly specialized field, which contributes significantly and fundamentally to the strengthening of the capabilities of the Libyan Army which serves the nation and protects our homeland.

The speech of His Excellency the Minister of Defence

The Prime Minister and Minister of Defence HE Mr. Abdul-Hamid Al-Debeiba

Given the importance of such exhibitions in presenting and showcasing everything that is new, the most important thing is the contribution to the strengthening of friendship and cooperation between many countries. While this exhibition is being held for the first time in Libya, it comes within the programs adopted by the national unity government in order to strengthen Friendship and brotherly relations between Libya and many different countries with mutual interests and strong ties with Libya.

This exhibition is also part of the programs aimed at restoring life initiated by the Government of National unity. By virtue of its mandate, the government of National Unity also aims to benefit from the experiences of developed countries in the exchange technology and information to serve a strong Libyan army capable of protecting the state. In addition to that the exhibition will be a great opportunity learn more about the latest scientific and technological developments in building modern and advanced armies. We hope that such exhibitions will continue to be held because of their crucial role in building a strong and advanced Libyan army.

Speech of the Chief of the General Staff of the Libyan Army

Lieutenant general: Mohamed Ali Al-Hadad
Chief of General Staff of the Libyan Army

Within the framework of building a strong Libyan army that relies on modern technology, this exhibition is considered one of the most important sources to benefit from the expertise of exhibiting companies, whether technological or equipment to keep abreast of development, similar to other armies, as well as to carry out the duties entrusted to the Libyan army and take advantage of modern and advanced equipment and devices to serve the protection of Libya's borders, especially for European countries seeking to combat illegal immigration, which is a huge challenge to address due to extremely long borders with countries where illegal immigration originates from. The equipment exhibited are the appropriate tools for the work of the army to perform well and provide military personnel with the ability to perform efficiently and professionally. Since Libya is in the process of building its army, we need such exhibitions that save time, effort, money for the efforts needed in the construction of an integrated, strong army capable of carrying out its duties.

Speech of the Director of Production and Investment Department at the Ministry of Defence

Chairman of the Supreme Committee for Exhibitions.
Brigadier General: Mabrouk Otman Al-Mabrouk

Within the framework of the tasks entrusted to the Production and Investment Department at the Ministry of defence to seek and contribute to building the military institution through holding such exhibitions that aim to enhance the capabilities of the Libyan army through the acquisition of all that is new in the world of defence technology and military equipment and through this exhibition, we aim to consolidate institutional work in the service of the military establishment. This exhibition will be a great gateway to keep abreast with global progress and development in the military field. The fair is the appropriate venue for local and international companies to open the way for concluding agreements and business contracts, which in turn will reflect positively on the Libyan economic situation. We aspire that this exhibition will be a powerful tool for strengthening military capabilities with friendly countries and neighbouring countries in strengthening the capabilities of the Libyan army.

Exhibition goals

- Rebuilding the military institution.
- Creating a military identity for the Libyan army through decision makers
- Building technical capacities of military personnel through training
- Developing the military arsenal.
- Meeting interested local, regional, and international specialists and manufacturers in the Military sector.
- Developing the military and security sectors through companies offering equipment, supplies and services participating in the exhibition and found in one place which is easily accessible
- Exchange of expertise, experiences, and ideas between the participants at the exhibition with the military and national security authorities as well as decision makers.
- Presenting modern equipment, supplies and services in the global market to the beneficiaries and interested parties in the Libyan national market.
- An opportunity for exhibitors to sell and promote their products, services, and expertise to establish direct relationships with local specialized agencies and businesses.
